

Director, Information Technology

Landcor Data Corporation was founded in 1988 and is part of the NIHO (Nielsen Holdings) group of companies. Landcor was established to meet the growing demand for a fast, accurate system to value and analyze properties without having to physically inspect each property. Landcor offers the best source of real estate data and analytic tools available to financial institutions, appraisers, and real estate agents. We continue to evolve to meet the needs of our clients.

As part of the senior leadership team, we are looking for an experienced Manager to lead our IT group, who will oversee and lead the continuous development and improvement of business IT solutions. This natural leader will bring out the best in his/her capable team of technical experts, to foster collaboration and innovation.

Leadership

- Manage a technical team of development and operational support administrators (4 – 6 staff), focusing on fostering a positive and collaborative environment.
- Set goals/expectations, drive project prioritization and resource allocations for projects.
- Build relationships with key employees among clients.
- Present/demo products and services to existing and new clients.
- Work with clients to narrow down their requirements and come up with a solution.
- Manage technology vendor relationships and provide technology road maps aligned with business goals.
- Prioritize individual and group tasks to meet conflicting demands.
- Solution designing with the internal teams.

Development and Project Management

- Lead and oversee activities of assigned projects to ensure goals and objectives are achieved within approved time frames, scope and budget.
- Anticipate project deviations and escalate the need for immediate corrective action.
- Contribute to business strategy utilizing Information Technology & Business Systems to create business value, operational efficiencies.
- Supporting technologies used to build business systems and applications that run the enterprise. These include:
 - **SharePoint 2013/365**
 - **MS Office365**
 - **SQL Server 2014-2016**
 - **SSIS/SSRS**
 - **NetSuite**
 - **.NET**
- Gather requirements from operational departments to develop reports, processes, & efficiency.
- Develop and manage an enterprise application roadmap and target application architecture.
- Evaluate and recommend our application build vs buy decisions.

Innovation

- Foster innovation within the organization to create new solutions that enable business results and to improve effectiveness of the business application model and delivery.
- Manage ongoing projects, from current customer requirements to incremental change management, to development of new systems components in support of business operations.

Who Are You

Skill Set:

- Natural leader with the ability to drive innovation of technical experts.
- Internal Customer Service Driven Aptitude: supporting high availability applications.
- Project Management: qualifications and experience interacting with multiple stakeholders.
- Communications: Excellent formal and interpersonal business management communications.
- Deep understanding of and experience applying system development methodologies.
- Ability to drive change with communication, influencing, leadership skills, & resource planning.
- Ability to interface with teams and customers to capture requirements, drive results, & build relationships.
- Strong time management skills, with ability to work with aggressive deadlines when required.
- Provide after hours support for production deployments, production downtime and installation of hardware.
- Ensure data compliance rules and procedures are being followed.

Education and/or Experience

- Bachelor's degree in Information Systems, Computer Science, or a related field.
- 6 + years hands-on experience developing business applications.
- Experience leading and managing large IT projects and rolling out IT infrastructures across various technologies
- Excellent working knowledge of computer systems, security, network and systems administration, databases and data storage systems, and phone systems
- Strong critical thinking and decision-making skills
- Excellent project management skills and strong ability to prioritize
- Experience in real-estate / financial industry is an asset.
